## Festival de Dança do Funchal

---

The Festival has as its own identity the unique opportunity to show the work of Dance Companies, Young Companies, new creators and projects, as well as promoting local cultural and artistic sustainability, bringing together the portfolio of the cast of artists and the educational nature of local schools.

With the goal of promoting culture, providing moments of sharing and new experiences through new experiences through dance, the Festival offers, in addition to the performances, family activities and workshops for all audiences, with or without dance experience.

Master classes are also a reality in this event, reserved to students in pre-professional training and professionals in the area of dance. During the Festival, the public will have the opportunity to establish contact and dialogue with the choreographers/dancers during Open Rehearsals.
